DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

Computer science is study of computer systems that includes the architecture of computer, development of computer software, information processing, computer application, algorithmic problem solving and the mathematical foundations of the discipline. The computer science program provides professional education in computers to prepare the student for Graduate study or for a career in the computing field. Students learn concepts and skills needed for designing, programming, and applying computer systems while also learning the theoretical and mathematical foundations of computer science..

The department is making its progress in preparing highly competent human resources required by the industry. The department provides high end computer systems with facilities to work on various platforms under the ageis of well trained faculty.

YEAR OF ESTABLISHMENT...

The Department of Computer Science Engineering was established in the year 2008 with an intake of 60 students and now department has intake of 120 students.
