pected Sir / Madam,  
 etings from ICT Academy!

Academy is an initiative of the Government of India in collaboration with the State Government of Tamil Nadu and industries. ICT Academy is a Not-for-Profit Society, the first of its kind pioneer venture under the Public-Private-Partnership (PPP) model that endeavors to train higher education teachers and students thereby exercising on developing the next generation of teachers and industry-ready students.

Academy in its endeavor to create a new generation talent pool has been working all along with Government departments and Corporates in initiating Skill Development Training Programs for the youth in various sectors.

Honeywell has inked an MoU with ICT Academy to implement its CSR initiative across states in India to skill graduating -year students on Advanced IT Skills. Honeywell, seeing abundant job opportunities available for the youth in the ITES industry has initiated to skill the graduating final year students from the rural and low-income family groups, helping them build their socio-economic levels. The objective is to skill the student youth and prepare them to deployable resources.

Academy through its Institutional tie-ups for skilling youth has taken up the responsibility to implement the initiative. We request the Institution to facilitate the students to make use of this opportunity and nominate 110 students for the training. The features of the training are given below.

### Key Features of the Training Program

- Establishing a Centre for Youth Empowerment (COE) under the CSR initiative of Honeywell.
- The COE is for skilling 110 students in Advanced Technology, in demand in the industry.
- Industry-endorsed curriculum meeting global standards.
- Joint Certification by Honeywell and ICT Academy to the youth successfully completing the training.
- 100 hours of activity-based and hands-on training.
- The Certificate Program is fully sponsored by Honeywell supported by ICT Academy and offered free of cost to the Youth students.

- Working with support team to identify and work on problems.
- Planning projects to restore smooth operation in event of major disruption.
- Eliminating errors and malfunctions.

### Project 2

Client	:	Litenov
Name	:	Health Care System
Team size	:	3
Version control tool	:	GIT
Build tool	:	Maven
CI & CD	:	Jenkins
Operating Systems	:	Linux
Application server	:	Tomcat

#### Description:

This is a project on Health Care system for maintain all the local hospital information. Each hospital has on-site doctors known as Resident Medical Officers who between them provide expertise and care to patients 24 hours a day, 7 days a week, under the direction of each patient's consultant.

#### Responsibilities:

- Configured such systems which can manage 1st level alerts itself.
- Working tightly with Developers team to resolve problem quickly.
- Setup CICD deployment using docker, EKS, Jenkins and Kubernetes.
- Configure Docker containers.
- Troubleshooting server performance and AWS resource related issues.
- Working actively for the cost optimisation of AWS Infra.
- Configure monitoring and alerts on AWS Production environment.
- Provide L2 support.

### Project 3

Client	:	Four Square
Name	:	Loan Approval and Payment System
Role	:	Build & Release Engineer
Team size	:	4
Version control tool	:	GIT
Continuous integration tool	:	Jenkins

#### Description:

Loan Approval and Payment system is an automated multi-application system by which customers the bank can have quick processing of their loan (Home, Personal) applications and set up one-time recurring payments. It consists of the modules such as Loan Authorisation, Audit Trails that reduce manual load on the staff and Payment module that provide convenience and control for the customer when paying back their loans. The customers can use the User Interface to keep track of all aspects their loans and their payment details.

#### Responsibilities:

- Installed, Configured and Maintained Ubuntu Linux in AWS environment.
- Created Virtual Machines by utilising AWS EC2 and configured security groups to restrict Inbound and Outbound access.
- Automated backups by shell scripting to transfer data in S3 Bucket.
- Implemented Continuous Integration using Jenkins and GIT.
- Terraform creation for backend applications like EC2, RDS, S3.
- Amazon CLI used to create vaults .
- Implemented Continuous deployment (CD) push button deploy using Jenkins.
- Implemented the setup for Master slave architecture to improve the Performance of Jenkins.
- Installed and configured Jenkins and created parameterised jobs to kick off build for different environments.
- CI/CD setups for Gitlab as well.
- Designed Modules to manage configurations and automate installation process.
- Troubleshooted the issues related to connectivity and low response times of application on P

instances.

- Setup Jenkins push button deploy to integration, staging and, productions environments.
- Installed and configured HAProxy load balancer to route the traffic between application servers.
- Created Ansible Play-books for Push Button Deployments through Jenkins.
- Created Server Build Playbook from the Scratch that does Tomcat App Server Installation, Nagios Agent Installation and App Deployments through Ansible Tower.
- Involved in Designing and Implementing host level migrations and replacing virtualisation using P2P and P2V.
- Troubleshooting and performance tuning of various systems problems such as application, network and hardware related issues.
